
PRESS RELEASE

Red Vector Welcomes Claire Moravec as Vice President of Digital and Human Intelligence

Claire joins the Red Vector Leadership Team to Create and Deliver Digital Safety Solutions for Public and Private Organizations.

Chesterbrook, PA – June 30, 2022 – Red Vector, Inc., a leader in insider risk solutions and pioneer of automated whole person insider risk analysis to help organizations mitigate insider risk, announced the appointment of Claire Moravec as Red Vector’s Vice President of Digital and Human Intelligence. Claire’s responsibilities will encompass developing and driving digital safety solutions via social media, OSINT, and UGC, in conjunction with human behavioral indicators to identify malevolent insiders. She will join the company’s executive leadership team.

Claire brings a wealth of experience in the investigations, intelligence, and digital safety space to Red Vector. At the Federal Bureau of Investigation, Claire was a leader among her peers, driving tactical intelligence operations against bad actors weaponizing digital and social media via counterpropaganda, misinformation, and disinformation campaigns. In 2017 Claire earned the FBI’s Medal of Excellence in recognition of her work supporting the National Covert Operations Section. More recently, Claire served as the Senior Leader overseeing Snapchat’s (NYSE: SNAP) Trust & Safety Response Operations Team. She is also an Adjunct Professor, teaching Undergraduate courses in criminal psychopathology, and Graduate courses in clinical social work.

“Claire has an impressive track record in developing, leading, and scaling global digital safety initiatives at both high-growth commercial firms and government organizations,” said Stephen Layne, Chief Executive Officer at Red Vector. “Her innovative, strategic, and results-oriented approach to driving awareness and high-impact digital safety programs, is a perfect fit for our rapidly growing team. We welcome her leadership and creativity as we continue to build Red Vector.”

Claire is a graduate of Columbia University in the City of New York, holding a Master of Science in Clinical Social Work. She also holds a Bachelor of Science in Criminology and a Bachelor of Social Work from Loyola University Chicago.

“I am humbled to be joining Red Vector and excited to expand upon the psychosocial foundation of the Fulcrum™ platform to integrate digital safety solutions,” said Moravec. “Red Vector is well positioned to deliver advanced insider risk analysis solutions to global institutions to reduce and eliminate malevolent insiders.”

About Red Vector

Red Vector is the automated whole person insider risk analytics company. The company provides advanced insider risk analysis solutions used by essential public and private organizations to reduce and eliminate threats before risks manifest. Red Vectors full-stack software solution, Fulcrum™, enables organizations to operationalize insider risk program best-practices. It automatically aggregates virtual, physical and human risk indicators for continuous evaluation by customizable risk models. Leveraging seven years of real-world data and analysis reducing the insider risks of some of the most critical organizations in the world, Red Vector is transforming the operational effectiveness of insider risk programs. Red Vector is headquartered in Chesterbrook, Pennsylvania. Founded by executives from Lockheed Martin, Leidos, IBM, and Moody's, Red Vector is on a mission to help insider risk teams ensure a trusted workforce from the risks posed by malicious insiders. Qualifying organizations can gain full access to Fulcrum™ by requesting a briefing.
